

Delivery Management Solution

Simplify. Perform. Improve.

Designed to increase your productivity and improve the customer experience.

Electronic signature

Obtain your customers' e-signature directly on site! Transfer your order confirmations instantly and accelerate the processing of your invoices.

Notifications

Improve customer satisfaction by sending them a text message (SMS) notification when your employee is on their way to complete the task.

GPS tracking

GPS tracking of your drivers keeps track of mobile device traffic where the app is connected. This allows, among other things, to verify each delivery point.

Live data transfer

Follow in real time the evolution of the different steps of the delivery process.

Take a photo

Take photos of completed work with the photo function integrated into our mobile solution and automatically archive them in customer files! Should a dispute arise, you'll be protected and resolution will be simpler.
