

Handheld Inventory Management Solution

Designed to increase sales and boost profitability on the go

Integrated to ACCEO OGC and ACCEO Omni | Use your in store Wi-Fi wireless network

Track products

Verify and control multiple locations and get a wealth of information on products instantly. Eliminate the use of paper documents and scan products directly from pallets.

Customer experience

Inform customers of product availability or upcoming shipments on the spot and ensure displayed prices are always accurate. Reduce lineups at the cash by preparing customers' orders in advance (available only with OGC).

Cycle counts

Speed up your targeted, cycle, and complete inventory counting processes to expedite updating your inventory. Take physical counts directly from the shelves using the integrated barcode scanner

Purchase orders

Order products instantly by scanning their shelf labels. Create purchase orders directly from the aisles, validate barcodes automatically and verify items already on order.
